SUBJECT: Town Halls Organized by What Matters in Our Valley

Dear Attendees:

Telkwa Mining was not involved in the planning or development of these Town Hall events and was not invited to participate until September 21, 2026. By that time, the event dates, format, and discussion topics had already been established, and What Matters in Our Valley had secured presenters and organized the events.

While we appreciate opportunities for public dialogue, Telkwa Mining expressed concerns regarding the effectiveness of a public forum. We also noted that holding both events on Saturdays, including one during a long weekend, could limit participation from community members wishing to engage in the discussion. We shared these concerns with the Bulkley Valley Community Resources Board and suggested that alternative formats and timing be considered to encourage broader and more constructive participation. However, given the significant planning already undertaken, changes were not made to the event format or timing.

Meaningful conversations about the future of the Bulkley Valley deserve an environment where all participants feel safe, are respected, and heard. Telkwa Mining remains available and committed to engaging directly with community members through open, respectful, and technically informed discussions about the Tenas Project. We encourage anyone seeking Project information to connect with us through the websites listed below, where questions can be submitted and answered directly by project specialists.
