

Summer 2026

COMMUNITY UPDATE

EVENTS & SPONSORSHIP

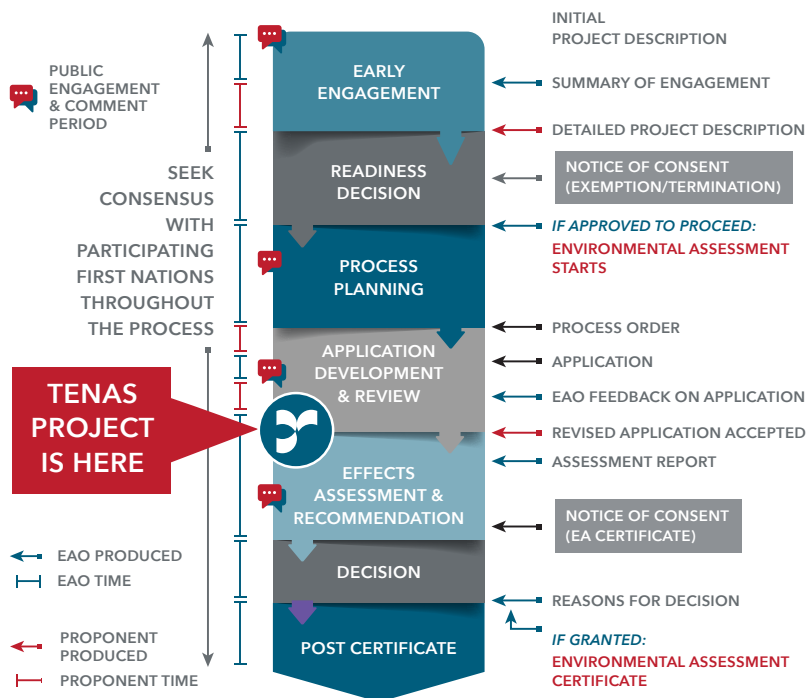

At Telkwa Mining, we remain deeply committed to the support of local non-profit organizations that are working hard to provide services and much-needed support to the communities of the Bulkley Valley. In 2025, Telkwa Mining donated over \$22,000 to local non-profit organizations.

In 2026, Telkwa Mining is looking forward to again supporting communities of the Bulkley Valley. We are excited to host the Welcome to Summer BBQ at the Father's Day Fishing Derby in June 2026. We hope you can join us at this event to interact with the Telkwa Mining team and other members of the community.

This will also be the tenth-year anniversary of our sponsorship of the Telkwa BBQ and hope you will join us for this event put on by the Bulkley Valley Kinsmen Club on September 4th to the 7th at the Telkwa Fair Grounds.

ENVIRONMENTAL ASSESSMENT (EA) PROCESS UPDATE

Throughout 2025, Telkwa Mining Limited (TML) continued to work with First Nations, government, BC Environmental Assessment Office (EAO) Technical Advisory Committee (TAC) and Qualified Professionals to answer the information requests issued through the Environmental Assessment process.

So far in 2026, TML has successfully responded to five of the six required information requests on topics such as caribou, fisheries, water, and Indigenous Rights and Title.

Once the information request phase is deemed completed by the EAO, TML will enter the Effects Assessment and Recommendation Phase in the summer of 2026 with a potential certificate decision expected early in 2027.

Assessment Certificate
Application on the EPIC Website

Telkwa Mining and our staff acknowledge that it is an honour to work, live, and play on the traditional territory of the Gitdumden and Laksilyu Clans of the Wet'suwet'en people.

Summer 2026

RaeJean
Laidlaw
Well Done Cooks

RaeJean owns and operates Well Done Cooks based out of Smithers – coordinating remote camp catering and cooking jobs across the region.

RaeJean has handled setup, catering, and logistics for Telkwa Mining's events – including baking hundreds of delicious cookies.

Beyond business, RaeJean is a dedicated community advocate, volunteer, and mother of three. In her downtime, she rides her motorcycle, sings in bands, captains 70-foot boats, digs holes with her new mini excavator, tends a thriving garden, and creates art through painting and sculpture.

Her outgoing, bubbly personality makes her a natural at the people-focused, high-energy work she does – and we're grateful she's part of the Telkwa Mining extended team.

NON-EA PROJECT UPDATES

Baseline environmental data collection continues throughout 2026. Telkwa Mining's consultants continue to monitor Four, Tenas and Goathorn Creeks water quality and quantity. Groundwater monitoring of the site network continues with two visits planned in June and October to check water level loggers, manually record well levels and collect groundwater quality samples.

Precipitation and evaporation (photographed) are examples of the baseline data we continue to collect this year.

After two years of recording bat high-frequency vocalizations (echolocation calls), our bat experts will be winding down the program in June 2026. Wetland assessments will be carried out this year after freshet, and the second year of terrestrial surveys will be completed at the same time on Goathorn Creek. We continue to monitor dust and noise seasonally for baseline data at specific locations in the Village of Telkwa. Fish population and stream aquatic insects studies are planned for August.

COMMUNITY MEETINGS

Visit [Let's Gather Witset Website](https://letsgather.witset.ca/)

Telkwa Mining has held more than ten Open House style events over the last decade, with five events being held in the region during 2026. Responses to your questions can be found at Home | Let's Gather Witset (<https://letsgather.witset.ca/>) under the Telkwa Mining - Tenas Project tab.

There will be additional opportunities for public input and review in 2026 during the BC Environmental Assessment regulatory review process with public events planned in several communities in the fall of 2026. Contact the BC Environmental Assessment Office for more information on opportunities for public input during their Effects Assessment at <https://engage.eao.gov.bc.ca/> (EPIC.engage).

Telkwa Mining is interested in engaging with the Public and Stakeholders groups in the Bulkley Valley and Northwest British Columbia. We maintain an open-door policy at our local office in Telkwa where community members and stakeholders are encouraged to drop-in. As always, we invite you to connect with us.
